

INTRODUCING

BIO360

BIO360 products are made from breakthrough technology combining biobased materials and certified recycled content designed to be industrial and/or home compostable. Delivering sustainable packaging solutions, while providing a premium consumer experience in foodservice products.

BENEFITS OF BIO360

- Home compostable products that look good, feel good, and actually perform.
- Inherently biodegradable leaving no remaining microplastics
- No PFAS or heavy metals: US FDA clearance for food contact applications
